

Systems Analysis Branch/P&PS/OL
WEEKLY STATUS REPORT
Week of 17 to 21 January 1983

I. Major Activities During the Past Week:

A. Support to OL:

FARS (Federal Automated Requisitioning System). A meeting was held on 18 January to discuss the feasibility of an automated transfer of the data contained in the Cross Reference Report from the FARS system to the Office of Finance. In attendance were

25X1 [redacted] SB/ADPP/OF, [redacted]
25X1 [redacted] of DCB/SD/OL, [redacted] of B&F/OL, [redacted]
25X1 [redacted] of IDSB/SD/OL, [redacted] of ADL/OF and Ron
25X1 [redacted] of SAB/P&PS/OL. [redacted]

ICS (Inventory Control System). Representatives from Systems Analysis Branch, P&PS/OL, and the Financial Systems Support Branch, SSD/ODP, met to discuss and coordinate schedules for tasks to be completed with respect to the target dates for the Major Enhancements to the General Accounting System. [redacted]

25X1 [redacted]
25X1 [redacted] Systems Analysis Branch,
met with the Data Base Managers of the ICS and CONIF data bases to
finalize specifications and requirements for processing data in
25X1 the ICS/CONIF interface. [redacted]

CONIF (Contract Information System). Two new attributes were added to the CONIF database this week -- CN/BF/OFF was added to the CONTRACT dictionary and CV/AUD/REMARK was added to the CNTRCTR/VNDR dictionary. [redacted]

25X1 [redacted]
FEDPARK (Federal Paid Parking System). Personnel in SM&FB/LSD/OL were given assistance in formulating GIMS queries for the FEDPARK application. [redacted]

25X1 [redacted]
ACF2 (Access Control Facility 2). The ACF2 rule database for logistics was updated to reflect changes in personnel and data access requirements. [redacted]

25X1 [redacted]
MISCELLANEOUS. On 20 January, [redacted] of Control and Expedite Branch/SD/OL, requested hardware and/or software assistance to automate the recording, processing, and reporting of voucher documents. The present system is completely a manual operation. The request is being studied. [redacted]

25X1 [redacted]
On 18 January, [redacted] of IDSB/SD/OL requested some additional reports to be generated for the vehicle application maintained on the Data General minicomputer. [redacted]

II. General Items:

None to report.

III. Problems:

A. Support to OL:

25X1 PDMIS (Procurement Division Management Information System).
25X1 Work is in progress on the RQADDUPDEXC procedure. This procedure
has a logic error which is causing problems for the Office of
Finance on the CONIF data base. [redacted] is working with me to
eliminate the problems. [redacted]

25X1 CONIF (Contract Information System). When attempting to do
25X1 retirements last week, a problem surfaced with the RETDISK job.
25X1 RETDISK sets up a disk for each of the major files to be moved
(retired) to the offline database. The JCL failed when it
executed the step that sets up the fourth file, with an IEF257I
error code (space requested not available). Bob Lovelace and
[redacted] of Customer Services Staff suggested that I
contact [redacted] since he wrote the JCL dealing with \$DISKS. The
problem is still being worked on at this time. [redacted]

25X1 AWCS (Automated Weapons Control System). Personnel in the
Data Access Branch/SD/OL have had several problems with the
updating of the NIPS data base for weapons. They have had
hardware and software problems with the floppy disks and mini
magnetic tapes. Work is continuing to resolve these problems.
[redacted]

25X1 ICS (Inventory Control System). A GIMANAL job run against
the ICS offline data base, ICSBAT, indicated that there were
problems with the data (unchained records). Customer Services
restored the data base to the last good backup which was January
2, 1983, the day before the month-end updates. The GIMANAL listing
showed no errors for this copy of the data base. The cause of the
problem has not been identified at this time. [redacted]

IV. Upcoming Events:

None to report.
